Table of Contents

- Problem
- Value Proposition
- Solution
- Momentum
- Questions

Traffic Congestion – approaching gridlock

Unites States:

1 hour/day

50% of Parisians:

2+ hours/day

Beijing:

5 hours/day

Additional Road Capacity

- Trillion Dollar investment
- 95% of congestion returns within 2 years

Ridehail/Autonomous

- UC Davis Study:
  - Increasing Congestion
  - 55% of rides would not have occurred or would have used public Transit

Evolve Public Transit – Decrease Traffic

Public Transit	Congestion
• 40 Billion rides/year • $1 Trillion/year industry • $366 Billion OPEX per year • RouteValet can achieve savings of up to 30%: $110 Billion year	• Direct cost: $138 Billion/year • Indirect cost: $82 Billion/year • RouteValet can achieve reduction in 10% of cars: $22 Billion/year • *Data for USA, UK, Germany and France only*

RouteValet value: $132 Billion/year

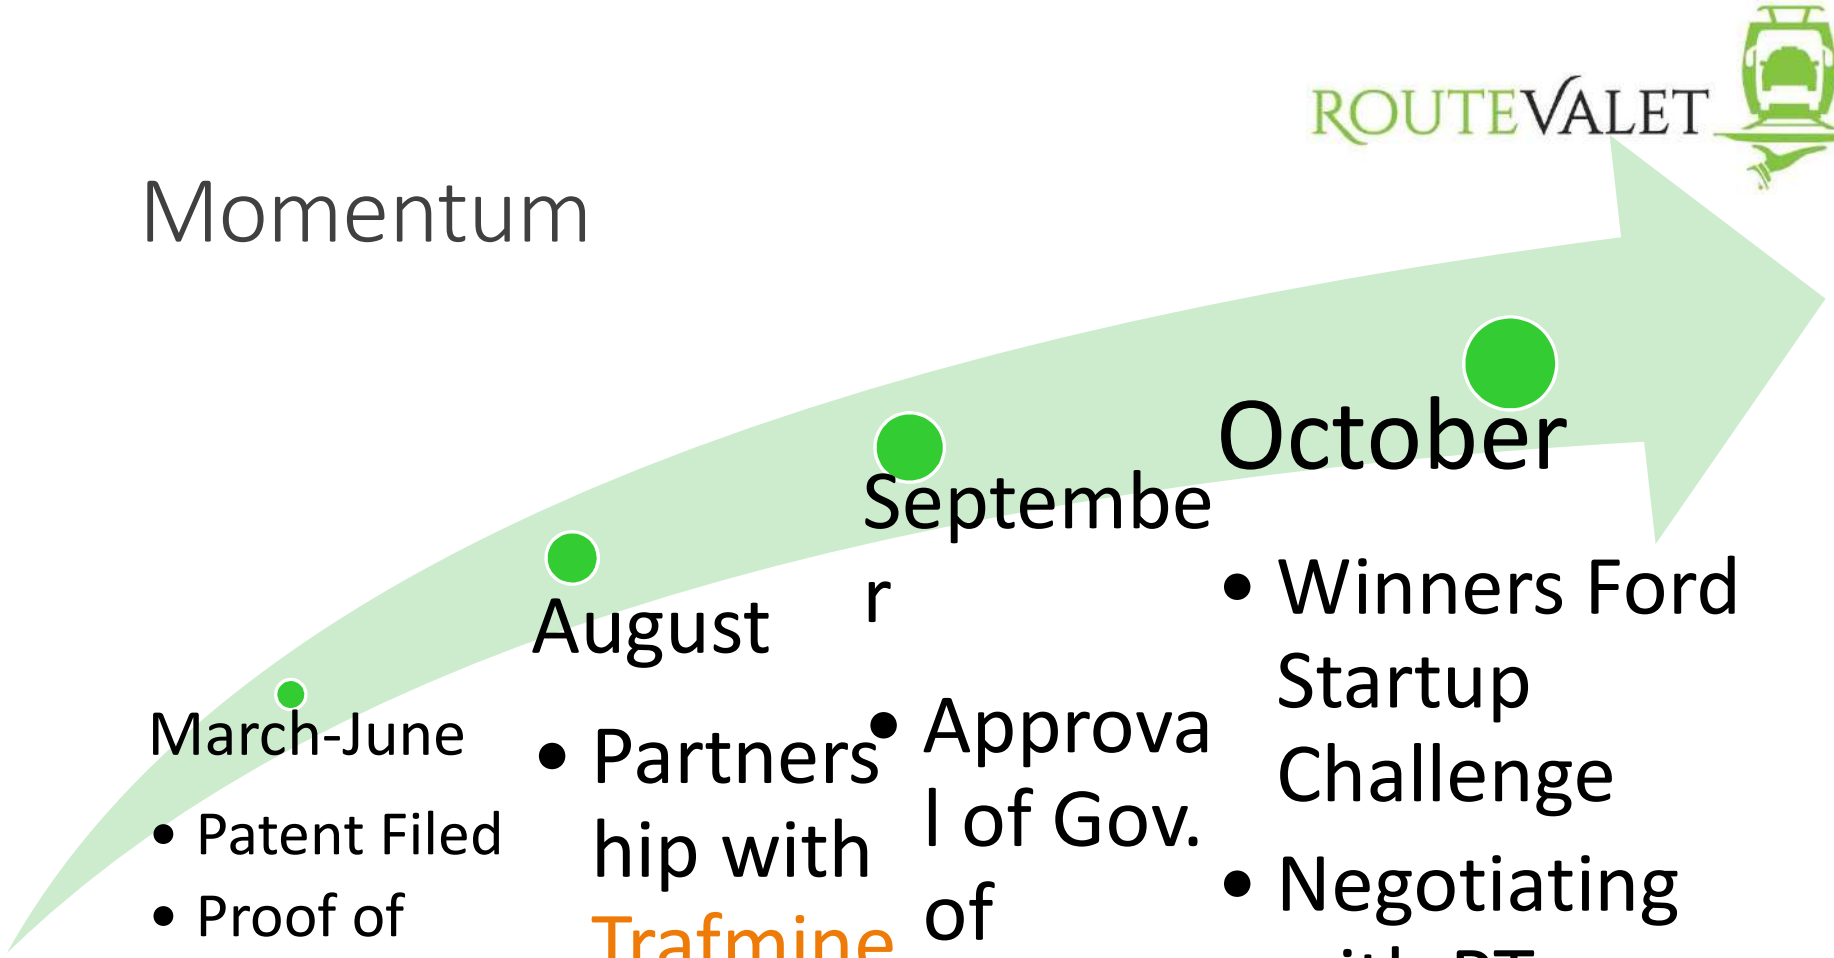
Solution - Intermodality

Patent Pending

Transit – Car and Bus

Transparent Pricing

Momentum



March-June
• Patent Filed
• Proof of Technology
• IIA awards
August
• Partnership with Trafmine
September
• Approval of Gov. of Cyprus
October
• Winners Ford Startup Challenge
• Negotiating with PT Operators in 4

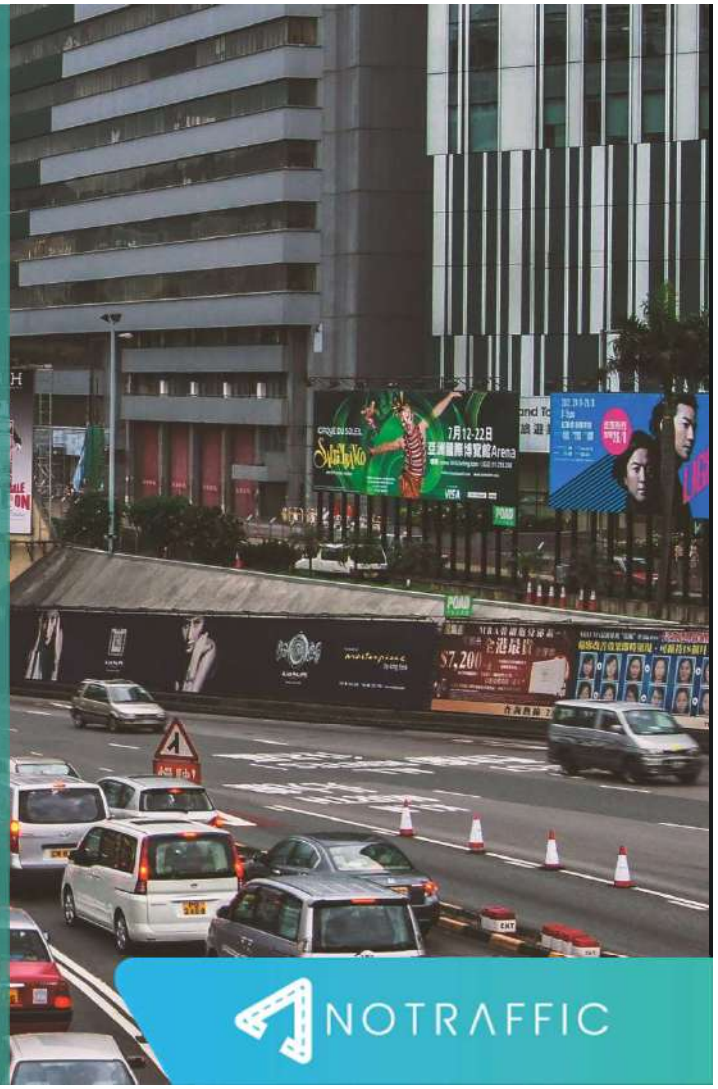
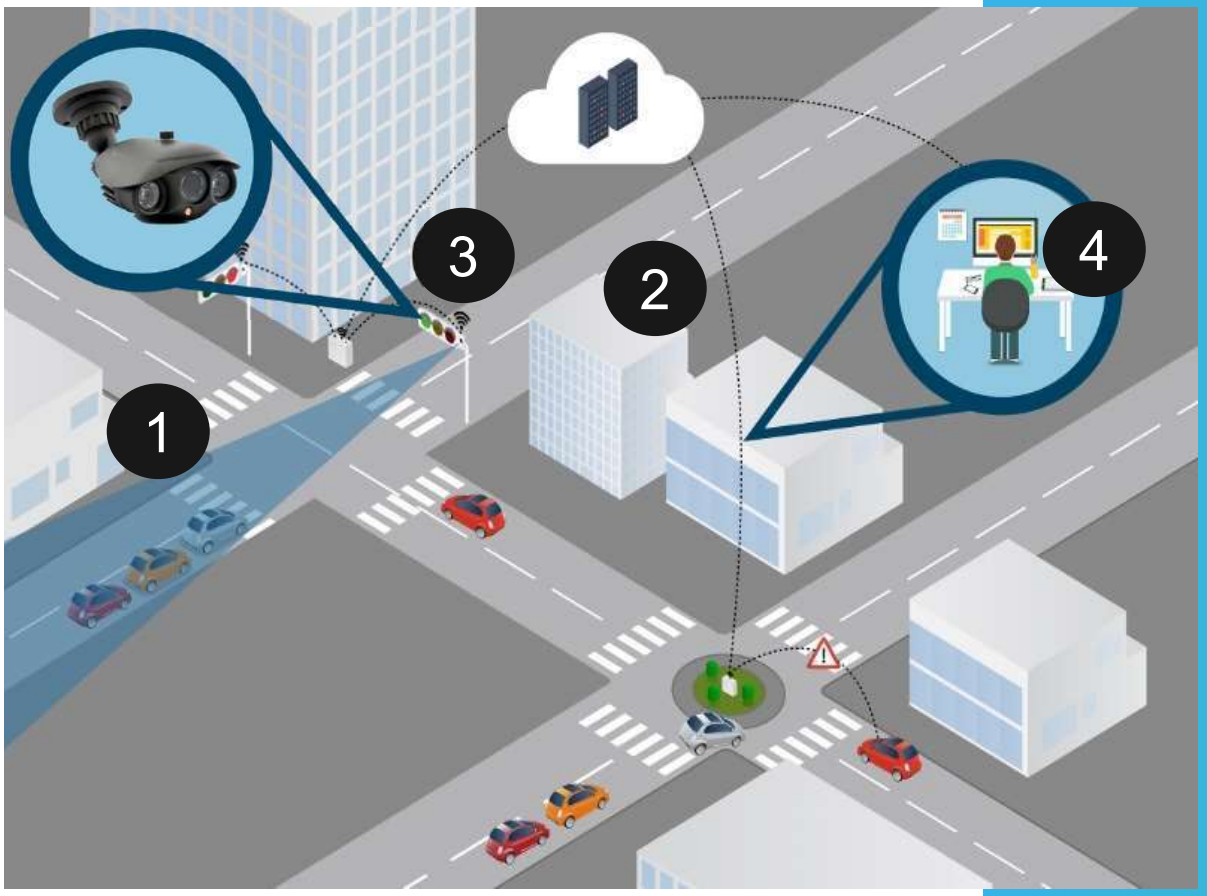
165,000





SOLUTION OVERVIEW

1 24/7 monitoring

2 Data Analysis

3 Real time response

4 Cloud based, web control center

UNIT SPECIFICATION

- Full HD IR illuminated CMOS Sensor
- mmWave 2T4R radar.
- Powerful computing module
- DSRC & LTE modules
- IP66 rigid case
- Design for low maintenance

* Illustration

- **Spec:**
- Effective car detection range: 50-200m
- Effective pedestrian detection: 10-50m
- Detection accuracy: 95% Video based
- Speed estimation: 90% Fusion based
- Speed estimation: 98%
- Accident detection
- Enclosure: IP66, NEMA 4X rated
- Temperature range: -20C - 74C
- Power: 24VDC/PoE Max 24W
- Traffic Controller interface: NTCIP, Serial, loop emulation
